

Nursing

Many nurses would describe their career as more of a calling. They feel compelled to and fulfilled by caring for others who are sick and injured. The Nursing Program at Tri-County Technical College has two different emphases to prepare you for such a rewarding profession.

Associate's Degree Nursing

This program will prepare you to become a Registered nurse. RNs have more responsibilities and more often work in hospitals. Their jobs require more critical thinking and often include these duties:

- Coordinate plans for patient care
- Instruct patients on how to manage illnesses after treatment
- Oversee other workers such as LPN's, nursing aides, and home care aides.

Practical Nursing

In this program, students learn the basic skills they need to become Licensed Practical Nurses. LPNs typically work in physicians' offices, home health care facilities, nursing care facilities, but not as often in hospitals. They also work under the supervision of an RN or another medical professional and perform basic medical and nursing care such as the following:

- Checking blood pressure and inserting catheters
- Ensuring the comfort of patients by helping them bathe or dress
- Discussing health care with patients
- Reporting status of patients to registered nurses and doctors
