

## INTENT TO SOLE SOURCE

### Catalyst One Chemistry Analyzer & Procyte DX Analyzer

Tri-County Technical College intends to sole source the procurement of a chemistry and hematology analyzer system. The products being considered are the Catalyst One and the Procyte DX Analyzers by IDEXX.

The Catalyst One uses dry slide technology with filtering layers and can run whole blood, serum, plasma or urine. It has the ability to run SDMA (symmetric dimethylarginine), Fructosamine, Phenobarbital, TT4, Urine Protein Creatinine ration and CRP. It can run single or group slides in under 8 minutes.

The Procyte DX provides a true 5-part differential and absolute reticulocyte count along with 24 whole blood parameters. It has body fluid analysis capabilities and is a fixed cost CBC system because it doesn't run on fluid packs or reagents.

Tri-County Technical College seeks vendors who can provide a system which meets or exceeds the above requirements. If you offer a product that will meet or exceed these requirements, please submit detailed product information which documents the above requirements are met. Responses will be accepted until January 14, 2019 at 2:00 PM. Please submit all inquiries and responses to Kristal Doherty at [kdoherty@tctc.edu](mailto:kdoherty@tctc.edu). This notice of intent, any amendments and the award will be posted at the following web address: [www.tctc.edu/purchasing](http://www.tctc.edu/purchasing).
