

Connect to an Available WiFi Network

To connect to the TCTC domain via VPN, you must first have an active WiFi connection.

Try It Out

1. Navigate to the lower right corner of your computer screen.
2. Click the Network icon  that appears in the toolbar.
3. A list of available networks will appear.
4. In the list of networks, choose the network that you want to connect to, and then select Connect.
5. Type the security key (often called the password).
