Multiple Measures Placement for Math

Tri-County Technical College now offers Multiple Measures Placement as an additional way to determine appropriate math placement. All students are required to take the placement test (NextGeneration ACCUPLACER). Upon request, the Math department will consider your placement scores along with your high school math courses and grades as shown on your high school transcript to determine if you can be placed into a higher level math course.

To qualify for Multiple Measures Placement consideration, you must have:

1. graduated from high school within the last three years (2017 – 2020),
2. an unweighted high school GPA of 2.8 or higher OR a weighted high school GPA of 3.2 or higher, and
3. a B- or higher in Probability & Statistics OR a C- or higher in at least one of the following courses: Algebra 2, Algebra 3, Pre-Calculus, Trigonometry, or Calculus.

How to be placed using the Multiple Measures approach:

1. Self-report your high school GPA, math courses, and grades using the following link to see if you qualify:

   https://www.surveymonkey.com/r/MMP2020

2. Print, or take a screenshot from your phone or tablet of the pre-qualification page from the self-reporting tool AND print proof of your high school GPA and math coursework. (This can be a copy of your unofficial or official high school transcript or a printout from PowerSchool.)

3. Contact Andrea Barnett at 864-646-1499 or abarnet3@tctc.edu or Keri Catalfo at 864-646-1621 or kcatalfo@tctc.edu.

Space in some math courses is limited. Your opportunity to register for a higher-leveled math course will be based upon course availability. Also, some math courses require a reading placement level of 25 or higher.

Please know that being placed into a course, using your placement test results or your high school record, does not ensure that you will pass the course.

Also, please remember to take advantage of Supplemental Instruction and Tutoring Services to help you be successful in your courses.
