Precisely machined parts are crucial to almost every industry, and with the strong manufacturing presence in Upstate, SC, there's a high demand for CNC programmers and operators. The CNC Programming and Operations associate degree was designed with employer guidance to prepare students for positions as highly skilled technicians. Graduates will become highly sought after candidates for local manufacturing companies and precision machine shops.

During your coursework in the program, you’ll learn not only writing CNC programs but also CAD design and analysis applications, creating precision set-ups, selecting tooling and operating a variety of CNC milling and turning centers.

Learn more about program requirements and related certificates. Scroll to the degree program and select “display programs.”

Tri-County’s program is taught in a state-of-the-art, health- and safety-focused facility designed to mimic a typical industrial facility. The modern equipment is in line with industry and evolving technology.

The wide variety of applications and job opportunities with skills gained from this program lead to careers in manual machining, custom machining, precision manufacturing, CNC operator training, CNC programming, CNC multi-axis programming and operation, CAD/CAM, metrology, precision inspection and more.

Many employers are currently turning to us to hire more highly trained individuals for these high-demand careers.

NOTE: SC WINS eligible
